To Whom It May Concern,

Michelle Marley Knox is a pro at what she does in every sense of the word. She was excellent at evaluating of the needs of our business regarding the solar panels, finding grants and tax credit information for us, and even stood on our roof and helped with the installation. She worked closely with me so that I could understand the workings of our system. She was always available to answer questions both before and after the installation. I would hire her again in a heartbeat!
