

October 11, 2014

Dear Sir or Madam,

I am writing this letter in support of WindSolarUSA and Nadler Electric. As a professional engineer and a renewable energy instructor for Lake Land College, I have had the opportunity to work with Nadler Electric on several electrical and renewable energy projects over the past seven years. Additionally, WindSolarUSA has been involved with bidding multiple photovoltaic systems and a 100 kW wind turbine for the college over the past three years. Both companies are very professional and conscientious about their work.

Working together, both companies recently completed a 120 kW photovoltaic installation upon the roof of Lake Land's 75,000 square foot West Building. WindSolarUSA and Nadler Electric did an outstanding job of designing and installing the system while meeting budgetary and time constraints.

Given their work history and successes at the college, I strongly recommend WindSolarUSA and Nadler Electric for any renewable energy project. Should you have any questions concerning their work at Lake Land College, please feel free to contact me at the phone number or e-mail address listed below.

Sincerely,

Joseph Tillman, PE
Renewable Energy Instructor and Coordinator
Lake Land College
