

Why Convert to LED?

Interested in LED lighting, but not convinced that it will generate the savings you want or concerned about the quality of light required for your employees and customers?

WindSolarUSA/LightEdison offer a wide range of LED lamps that offers the aesthetic and practical qualities of conventional lamps, as well as being economical and environmentally friendly. They are mercury free, use far less energy and last longer than their halogen, fluorescent and incandescent counterparts. They can be used everywhere, from indoor to outdoor, and from general lighting to mood lighting to spotlighting.

Clear Advantages

- Reduced Energy Consumption (Typical reductions 40-80%)
- Reduced Maintenance Costs (Goes to \$0)
- Improved Light Quality (Much less lumen depreciation)
- Improved Workplace Productivity (Enhanced performance)
- Reduced Air Pollution (Avoided utility emissions)
- Reduced Cooling Costs (Create virtually no heat)
- Increased Flexibility & Control (Myriad form factors)
- Increased Durability (20+ year lives common)
- Increased Applications (Work virtually anywhere)
